

LITTLEBOROUGH SILVER SURFERS - session 5

All the information and links below are at

Public transport websites

These are all fairly self-explanatory. Note that both train websites should give you the same information, but the National Rail site is usually quicker if you just need train times, whereas The Trainline is slightly clearer about fares. If you want to actually buy tickets online, use The Trainline.

The Greater Manchester journey planner is most useful for buses, but it does trains and trams too.

There are many, many flight search websites - Skyscanner is one of the most straightforward. But remember you can always google e.g. "seattle cheap flights"
